

The
Green Flame GAS CO.

Safety Regulations.

Introduction

Dear customer your safety is very important to us as it is to you, we have made this book specially to help you to protect your self and your family against all dangers that might happen because of accidents.

About Natural Gas

Natural gas is a combustible, gaseous mixture of simple hydrocarbons, usually found deep underground. Natural gas is a fossil fuel made up mostly of methane, but does contain small amounts of other gases, like ethane, propane, butane and pentane. Methane is composed of a molecule of one carbon atom and four hydrogen atoms.

Natural gas is used by homes, businesses and industries. More than half of all homes in the United States heat with natural gas. Natural gas is also used to make electric power and for cooling, and as a transportation fuel. Natural gas is the cleanest burning fossil fuel, producing primarily carbon dioxide and water vapor. Other fossil fuels are coal and oil, which together with natural gas, account for about 88 percent of U.S. energy consumption.

Scientists think that natural gas was formed millions of years ago when plants and tiny sea animals were buried by sand and rock. Layers of mud, sand, rock and plant and animal matter continued to build up until the pressure and heat from the earth turned them into petroleum and natural gas.

Gas Smell

Who puts the smell in natural gas?

GAS originally comes odorless, tasteless, and colorless. They (Producers) have to add smell to it so you can recognize it as soon as you smell it.

If you smell gas

1- Leave the building (home or business) immediately, taking everyone with you (including pets), and leave all doors and windows open behind you. Don't re-enter the home to open doors and windows.

2- Do Not:

- *Use phones, computers, appliances, elevators or garage door openers.
- *Touch electrical outlets, switches or doorbells.
- *Smoke or use a lighter, match or other open flame.
- *Position or operate vehicles or powered equipment where leaking gas may be present.
- *position or operate vehicles or powered equipment where leaking gas may be present.

3. From a neighbor's home or nearby business, you can call this number 4911811, and we will give all the help we can and more.
